EDUCATION

2024 - 2028

NORTHCAP UNIVERSITY

- B.TECH
- 9.03 CGPA
- Hatch Scholarship for Women in STEM Education, 2026 from HATCH

2023 - 2024

SURAJ SCHOOL

- Senior Secondary (XII)

SKILLS

- Programming languages: Python, SQL, Java, HTML, CSS
- Libraries/Tools: Pandas, NumPy, Scikit-learn
- Concepts: Machine Learning, Data Structures & Algorithms
- Database management: MySQL, MongoDB
- Soft Skills: Communication, Time Management, Creativity, Leadership
- Teamwork and collaboration
- Problem-solving
- Data Visualization & BI: Microsoft Power BI

PROFILE

Aspiring AI and Machine Learning student with hands-on experience in Python, data analysis, and machine learning through internships and academic projects. Proficient in Python, Pandas, NumPy, Scikit-learn, SQL, and Power BI, with a strong interest in building data-driven solutions and solving real-world problems.

WORK EXPERIENCE

- **Intern – Machine Learning with Python** **04/2026 - 05/2026**
 - Built and evaluated ML models on datasets containing 5,000+ records
 - Performed data preprocessing and feature engineering, improving model efficiency
 - Used Pandas, NumPy, and Scikit-learn for model development
 - Worked on end-to-end machine learning pipelines
 - Developed a tumor classification model achieving 97% accuracy
 - **Intern – Artificial Intelligence (AI)** **11/2025 - 12/2025**
 - Applied essential machine learning methodologies, emphasizing the development and execution of supervised learning models.
 - Developed classification systems using supervised learning algorithms
 - Analyzed datasets and evaluated model performance
 - **Machine Learning Intern | Unified Mentor** **06/2026 - 08/2026**
 - Developed two ML projects: Restaurant Channel-Wise Profitability Analysis and Student Segmentation.
 - Performed data preprocessing, EDA, feature engineering, and model evaluation.
 - Built ML solutions using Python, Pandas, and Scikit-learn.
- ## PROJECTS
- **Face Recognition System** - Built a real-time face detection application with OpenCV and Python [GitHub](#)
 - **Student Segmentation & Personalized Course Recommendation** – Built an ML-based system to segment learners using clustering and data analysis. [GitHub](#)
 - **Restaurant Channel-Wise Profitability Analysis** – Analyzed restaurant sales data to identify profitable channels using Python and machine learning. [GitHub](#)
 - **Tumor Classification** - ML model achieving 97% accuracy using Scikit-learn [GitHub](#)
